High Performance Print Lifters

The unique quality of these High Performance Print lifters is their heat stability, allowing them to be used in hot conditions. Other qualities include jet-black colour and a high-gloss finish. The thick, non-aggressive, low-tack layer allows traces to be lifted from almost every surface, including porous material such as paper and cardboard. Lifted prints can be transported for photography or closer examination.

Benefits:

- Stable in hot & cold conditions
- Lift from virtually every surface
- DNA preserved
- One product, many applications
- Weak traces are clearly visualised
- Sharpness and rich contrast
- Contain no animal by-products

High Performance Print Lifters

Unlike other lifting media, High Performance Print lifters have been especially developed for the lifting of finger prints, shoeprints, dust marks and micro traces.

Our High Performance Print Lifters are available in the following sizes:

Fingerprint Lifters: 13 X 18 cm (5" x 7") / 10 sheets

Footprint Lifters: 18 X 36 cm (7" x 14") / 2 sheets
13 X 36 cm (5" x 14") / 2 sheets

Colours: White or Black
